20 years of good quality

Jugotex was established in 1996 as a company specialized for manufacturing protective workwear. Today, more than 360000 pieces of workwear and special protective wear are manufactured in our state-of-the-art production plant every year. We cooperate with over 50 Serbian, regional and European companies.

Owing to our experience and expertise, we are able to design clothes for extreme conditions and different working environments in which quality and functionality of workwear are key to safety and health protection at work.

The guiding principles in our work are: high-quality materials, top-notch design, adherence to deadlines and reasonable prices.

Workwear

Your employees are always on the move. Sometimes they work inside, sometimes they work outside.

They need comfortable and practical clothes. They also need to be noticed and to look well.

Our workwear meets all your expectations – materials of excellent quality, recognizable image, protection against weather and specific conditions at your workplace and, last but not the least – our products are extremely comfortable.

Protective Wear

If work in your industry entails hazards, the safety of your employees is of utmost importance. If they have to be protected against fire, low temperatures, natural disasters, accidents... our protective wear made of special fabrics will give them the feeling of safety and lasting comfort.

Defense Wear

Our top-quality defense wear meets all demands of defense professionals and reduces potential risks in the field. As we make sure to conform to the strictest global standards and to use innovative materials, we are able to make the best possible combination – we make clothes which are comfortable to wear, offer protection, and give the freedom of movement.

Waterproof Wear

If your employees spend a lot of time outdoors, they need clothes to protect them from cold weather, heavy rain and wind, while giving them at the same time the feeling of comfort and freedom of movement. By using modern fabrics and special manufacturing process, we make workwear which is fully resistant to different weather conditions, breathable and comfortable to wear throughout the day.

TEAR RESISTANCE TESTING

We follow global trends

Only the best is good enough for us. The materials we use, the production process and the testing of finished products are all in compliance with the strictest global quality standards.

The fabrics and raw materials we use are produced by renowned international companies. Their quality is constantly tested in local laboratories specialized for testing of textile industry fabrics, as well as in prestigious European laboratories.

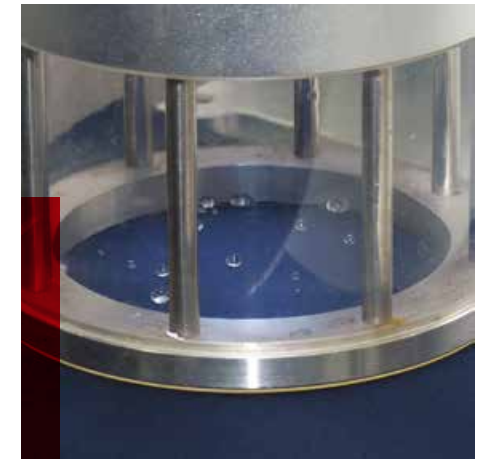

Our company operates in compliance with strict global standards and has been awarded the certificates ISO 9001, ISO 14001 i OHSAS.

FLAMMABILITY TESTING

ELECTROSTATIC TESTING

WATER REPELLENCY TESTING

TENSILE STRENGTH TESTING

COLOUR TESTING
